

Learning Can Happen Anywhere with LEGO® Education

Today's schools must be prepared to deliver curriculum and support students across multiple learning environments. LEGO® Education offers teachers the resources to adapt their hands-on lessons so that learning can occur in a variety of situations, whether it's in-person, virtual or a blend of these two approaches. This means that no matter where learning happens students can be engaged in hands-on STEAM lessons that build the confidence and resilience that is so vital right now. LEGO Education solutions are designed to be intuitive and adaptable, giving teachers flexibility and ensuring that Learning can Happen Anywhere.

We're here to support teachers in the classroom with a range of resources like hygiene guidelines, best practices, and tips for keeping learning hands-on in the era of physical distancing.

Whether in person, at a distance, or a combination of the two, let learning happen anywhere with help from our adaptable solutions, lessons with support for hybrid learning, inspirational guides and more.

Virtual learning can still be hands-on learning. LEGO® Education supports teachers with helpful guides, third-party virtual experiences and other useful resources to keep virtual learning engaging and collaborative.
