

# STEAM ahead across your school NEW LEGO® Learning System.

Future-proof your students' skills, and make them confident life-long learners by giving them unlimited possibilities for hands-on, playful STEM learning with the new LEGO® Learning System. From LEGO Education this system provides consistency and progression to deepen STEM learning and prepare students across all levels to be creative, resilient, independent, life long learners.

## ROBOTICS for Grade 1-4 45345 SPIKE™ Essential

SPIKE™ Essential ignites students' passion for STEAM learning through playful, problem solving preparing them to be resilient, independent thinkers. Progressively build students' knowledge and skills with an intuitive programming progression from icon to word blocks. Prepare students for advanced opportunities with SPIKE Prime, through a consistent learning structure using the same app.

## ROBOTICS for Grade 5-9 45678 SPIKE™ Prime

SPIKE Prime combines Australian curriculum aligned STEM lessons with LEGO bricks, motors, sensors and a programmable multi-port Hub to build confidence to code. The progression from word block Scratch-based to Python coding provides advance opportunities. It allows students to explore topics such as the design process and data science, setting the foundation for learning about real-world technologies like machine learning and artificial intelligence.

## STEM for Grade 1-4 45401 BricQ Motion Essential

An engaging introductory hands-on STEAM solution that encourages students to discover physical science in action. BricQ Motion Essential engages early years students in STEAM learning as they experiment with forces, motion, and interactions in the context of sports.

## STEM for Grade 5-9 45400 BricQ Motion Prime

BricQ Motion Prime engages middle years students in STEAM learning as they experiment with Newton's Laws of motion, forces, and interactions in the context of sports. Using special elements like pneumatics, gears, levers, axles and pulleys, students deepen their understanding of abstract physical science phenomena and apply scientific principles in order to solve real-world problems.
